

**Pinnacle Industrial Enterprises**

# **Company Profile**

Pinnacle Industrial Enterprises (PIE) is a progressive organization with diversified interests. Our key advantage is in offering partners, clients and customers with cost and logistical advantages in the products we offer and the business transactions we enter into.

Our current thrust areas include development of industrial and service projects as joint ventures/licenses in India and GCC countries, trading in healthcare equipment, electronics and building materials, and sourcing, evaluating and supply/export of manufacturing plant/equipment.

Our USP lies in our unique strength in match making between investors and technology providers resulting in successful projects and joint ventures, and bringing new and innovative products and technologies to the markets we are active in.

**Pinnacle Industrial Enterprises**

## Who we are and what we do?

The promoters of PIE have with them years of experience from industries such as software, manufacturing, academia and consulting. All combined, this provides the company with the broad vision and exposure needed to help us identify and work according to our clients' unique requirements.

Pinnacle Industrial Enterprises (PIE) has interests in diversified areas and maintains key focus on the following three areas:

1. Trade of Building Materials, Healthcare Equipment and other Innovative Products
2. Sourcing and Supply of Manufacturing Technologies, Equipment/Machinery and Plants
3. Development and Promotion of New Industrial Ventures/Manufacturing Projects

## Some of our achievements?

The promoters of PIE have over the years been instrumental in assessing/developing several projects from the manufacturing and service sectors. A partial list of some projects done in India and Saudi Arabia includes:

Xanthan Gum Manufacturing
Industrial Valves Manufacturing
Industrial Batteries Manufacturing
Drilling Chemicals Manufacturing
Industrial Packaged Systems
Charcoal Briquette Manufacturing
Fiberglass Manufacturing
Compact Fluorescent Lamps Manufacturing
Copper Tubes, Pipes, Rods, Bars & Insulated Conductor Manufacturing
Chemical Backfills for Electrical and Corrosion Protection
Used Lube Oil Recycling & Bleaching
Transformer Radiator Manufacturing
Inspection & Testing Services
Passenger Car and Commercial Vehicle Tire Manufacturing

**Pinnacle Industrial Enterprises**

## **Projects Development**

PIE develops projects pro-actively and also upon client request. Part of the essential responsibility PIE assumes is to establish the techno-economic preliminary viability and assess it to determine its worthiness for further resource and time investment.

Where necessary, PIE will actively seek and engage value adding technology or joint venture partners, or simply facilitate the essential components of technology transfer.

## **Deal Flow Facilitation**

PIE is also actively involved in deal making for projects in need for finance in forms of equity/debt for projects considering expansions or stake dilution for capital need. We are also active in facilitating private equity placements into new and existing projects through our association with investment banks, investors, etc.

PIE is associated with several project finance and investment banking institutions worldwide and will fund sourcing for projects seeking finance.

Subsequently, where financiers or investors looking for projects, PIE will offer from its stable, projects that have been evaluated and are ready for financing.

## **Technologies**

PIE can offer technologies from its sister/associated concerns for manufacturing:

1. Cement Board (Cellulose or Fiber Based)
2. Corrugated Roofing Sheets (Fiber Based)
3. Aerated Autoclaved Concrete Blocks (AAC Blocks)
4. Insulation Blocks
5. Lightweight Building Panels
6. Sandwiched Solid Surface (Patented)
7. Lightweight Calcium Silicate Ceiling Tiles (Patented & Proprietary)
8. Used Lube/Motor Oil Recycling & Bleaching

**Pinnacle Industrial Enterprises**

# Products

PIE is involved in promoting and trading in the following products:

1. Building Materials
2. Innovative Electronic Products
3. Electric Powered Wheelchairs
4. Low Temperature Medical Thermoplastics for Splinting
